

GeoTest Laboratories Adlington

Client Update 2007

We would like to take this opportunity to wish all our clients a very happy Christmas and to thank you all for your support during the last 12 months

We have had an exceptionally busy year I am pleased to say and in April we gained UKAS accreditation for Los Angeles Coefficient, Grading to BS EN, 10% fines and One Dimensional Consolidation.

We also gained accreditation for Plate Load including equivalent CBR and Core Cutters on site.

As planned we have invested in new equipment to improve the service we offer with a major increase in Permeability systems to meet peak demand and additional plate load systems to supplement the growth in on site testing.

A major development has been obtaining the licence and security clearance to operate NDG's. Our licence was approved in September and we have been busy operating on Landfill and Construction sites since then. We have also put a number of staff through PTS training and the majority now either hold or are about to obtain CSCS cards.

We have also had great success with the soils description courses running a total of 5 courses with a total of a round 96 delegates. Further courses including an introduction to laboratory testing are planned for early 2008. If you would like a course tailored to your particular companies needs please contact us to discuss.

Our plans for 2008 include adding further permeability systems to meet ever growing demand and increasing our scope of on site testing, testing to include Falling Weight Deflectometer (FWD) and Dynamic Cone Penetrometer.

We will be sending out our annual feedback survey shortly and as always I look forward to your responses. As the survey is being sent out a little later this year we will not be offering an alcoholic inducement for you to return them but I'm sure we can think of something.

Wishing you a very merry Christmas and a Happy and prosperous New Year
